\* No Target Area

The XN spot weld nut features a long narrow body suitable for attachment in confined areas such as channels, narrow angles or close to corners, as well as for general applications. The XN spot weld nut has a precision pilot, full threads and is countersunk for easy entry of mating screw.

There is an electrode target area of reduced thickness found on the 1/4–20 and smaller thread sizes. This target creates a more favorable balance of material thickness when the XN is welded to lighter gage stock, where the majority of the smaller sizes are used.

Material: .....C1010 High-Welding  
Quality, Low Carbon Steel

Finish: .....Plain, Unless Specified

Threads: .....Unified Standard Class 2B  
ASME B1.1-2003

## The Ohio Nut and Bolt Company

Sales Office: Buckeye Fasteners • "Your Factory Source"

5250 West 164th Street • Cleveland Ohio 44142
